

LexiScale

LOCALIZATION & AI DATA STUDIO · 125+ LANGUAGES

Powering global growth through language intelligence.

A professional localization and AI data studio helping brands and AI teams communicate — and train models — clearly, accurately, and natively in every market.

Company Profile
2026 Edition

info@lexiscale.com

The human layer behind global products and better AI.

LexiScale helps brands adapt websites, apps, documents, learning content, games, and video for every market — and gives AI teams the multilingual speech data, annotation, and evaluation their models need. Every audience, and every model, gets language that feels clear, culturally tuned, and confidently on-brand. We combine vetted native linguists with a disciplined, three-layer quality system, and we operate under NDA from day one.

Our Mission

To make every audience — and every model — feel locally imagined, by pairing native human expertise with a rigorous, repeatable quality system.

Our Vision

To be the trusted human layer behind great localized products and better AI models worldwide, across 125+ languages.

AT A GLANCE

125+

Languages & locales

500+

Vetted linguists & data contributors

3×

Independent QA layers

24h

Response on new enquiries

95%+

Target inter-annotator agreement

100%

NDA & consent coverage

Two divisions, one shared quality system.

Choose a single workstream or combine them into one operating rhythm — from source content and multilingual delivery to the data that trains and evaluates your models.

LOCALIZATION & MEDIA

01

Website Localization

Market-tuned messaging, navigation, and multilingual SEO for landing pages, product journeys, and ecommerce.

02

App & Software

String handling, UI-expansion awareness, and release-ready QA for native-feeling product language.

03

Document & Regulatory

Review-led delivery for contracts, SOPs, policies, training packs, and regulated content.

04

Multimedia Transcreation

Subtitles, scripts, voice direction, and creative adaptation for campaigns and learning assets.

05

AI-Assisted MTPE

High-volume workflows where machine output is refined by expert reviewers for tone and accuracy.

06

Interpretation

Scheduled interpreting and multilingual support for meetings, onboarding, and sensitive sessions.

07

eLearning End-to-End

Course adaptation from authoring export to SCORM/xAPI, LMS deployment, and voiceover.

08

Game Localization

UI strings, dialogue, subtitles, age-rating adaptation, and LQA for console, PC, and mobile.

09

Voice Over & Dubbing

Native voice talent, studio recording, and lip-sync dubbing with audio QA in 125+ languages.

AI DATA SOLUTIONS

A full data division — **AI Speech Data Collection**, **Data Annotation & Labeling**, **Transcription & ASR**, and **LLM Training & Evaluation** — detailed on the next page.

The human layer behind better AI models.

Great AI starts with great data, and great data starts with real people. Our vetted native-speaker network records, transcribes, annotates, and evaluates in 125+ languages — so the models you train sound less like machines and more like the people they serve.

Speech & Voice Data

Scripted reads, free-flowing conversation, wake-word utterances, and bilingual code-switching — balanced, quality-checked, and consent-backed.

Annotation & Labeling

Transcription, entity & intent tagging, sentiment, segmentation, and moderation across text, audio, image, and video.

Transcription & ASR Data

Verbatim and clean-read transcription, time-alignment, and speaker diarization with audio QA at scale.

LLM & RLHF Services

Preference data, response writing, prompt sets, red-teaming, and multilingual evaluation by native readers.

LANGUAGE COVERAGE

125+ languages across every major region — European, Asian, Middle Eastern, African, and the Americas.

+ 113 more

Built for regulated, product-led, and customer-facing teams.

01

Life Sciences & Healthcare

Patient-facing content, training, and precise terminology for sensitive communication.

02

Legal & Compliance

Contracts, policies, and disclosures that stay clear under scrutiny.

03

Technology & SaaS

Product interfaces, release notes, support content, and onboarding journeys.

04

Retail & Ecommerce

Campaign messaging, product copy, and multilingual paths that protect conversion.

05

Learning & Training

Courses, assessments, and onboarding that still teach well after adaptation.

06

Support & Operations

Macros, knowledge bases, chat flows, and internal guidance for service teams.

WHY LEXISCALE

Sector-Matched Teams

Specialists who already know your industry's terminology and audience — not generalists learning on the job.

Fixed Scope, Real Deadlines

A confirmed timeline and fixed cost before work begins. No surprise scope creep.

Built to Scale With You

From a single landing page to a rolling 12-language release calendar — same process, same quality bar.

One Contact, Full Accountability

A project manager coordinates everything, so you never chase multiple people for one answer.

From brief to delivery, nothing falls through the cracks.

1 Brief & Intake

You share content, target languages, deadline, and brand notes. We ask the right questions upfront.

24h response window

2 Scoping & Quoting

We assess volume, complexity, and formats. You get a fixed scope, timeline, and cost.

Fixed-price quote

3 Kickoff & Matching

Your PM assembles a sector-matched team of translators, editors, and engineers.

Sector-matched team

4 Translation & Adaptation

Terminology and style guides are applied from the first segment; queries resolved live.

CAT tools + style guides

5 Review & QA

An independent editor reviews the full output; LQA validates layout and function.

3-layer review cycle

6 Delivery & Handoff

Files arrive in your format with QA sign-off and a brief post-delivery check-in.

Format-ready output

QUALITY ASSURANCE — THREE INDEPENDENT CHECKS

LAYER 01

Native Translation

A qualified native linguist, matched to your sector, produces the first pass against your glossary and style guide.

LAYER 02

Independent Review

A second linguist edits for accuracy, tone, and consistency — the work is never self-checked.

LAYER 03

LQA & Sign-off

Linguistic QA validates layout, function, and formatting, with agreement scoring before handoff.

LET'S TALK

Tell us what you need, and we'll shape the right multilingual path.

Send your brief, timeline, or sample material and we'll turn it into a clear plan — with a fixed scope, a sector-matched team, and a 24-hour response on new enquiries.
